

World BioProtection Summit to unleash novel technologies and products on December 1

10 September 2022 | News

The World BioProtection Forum's India Chapter and Sharda University are organising the World BioProtection Summit India (WBS-India) 2022 on December 1 at Sharda University, Greater Noida, India. WBS-India 2022 will bring these solutions to the Indian BioAg/Agritech sectors, with international experts who can help companies in India to expand their networks and achieve their goals. The event will gather Innovators, Academics, Manufacturers, Agronomists, Technical managers, IPM practitioners and End-users in the BioProtection sector, at the highly reputed Sharda University.

The World BioProtection Forum's India Chapter and Sharda University are organising the World BioProtection Summit India (WBS-India) 2022 on December 1 at Sharda University, Greater Noida, India. WBS-India 2022 will bring these solutions to the Indian BioAg/Agritech sectors, with international experts who can help companies in India to expand their networks and achieve their goals. The event will gather Innovators, Academics, Manufacturers, Agronomists, Technical managers, IPM practitioners and End-users in the BioProtection sector, at the highly reputed Sharda University.

This year's event has two main objectives, **Accelerating novel technologies and products for global market** and **Connecting academia and industry, creating synergy for faster advancement of the Bioprotection sector**.

The organisers would welcome presentations from innovative companies, academics and researchers who are involved in innovation, efficiency, and productivity through the commercialisation of innovative solutions and new production systems to the topic of the conference. Exciting exhibition and sponsorship opportunities are also available for companies wanting to showcase their products and technologies, and to demonstrate their imagination, innovation and excellence in the industry.
