Graminex® Rye Pollen Achieves Novel Food Registration in China

United States based Graminex®, the exclusive grower and manufacturer of rye pollen has achieved novel food registration in China for Rye Pollen and appointed Guangzhou Narnia Biotechnology as its distribution partner in China.

Graminex is a leader in the international dietary supplement industry with vertically integrated manufacturing has products sold in more than 47 countries. Guangzhou Narnia Biotech will represent Graminex® Rye Pollen active ingredients, as well as the dietary supplements, primarily focusing on the areas of prostate health, women's health, and liver support.

"Our market is increasingly looking for high-quality dietary products." We are very excited about the opportunity to market high quality dietary ingredients that have been recently registered in China," said Daniel Guo, General Manager, Narnia Biotech.

Narnia is headquartered in TIMES E-PARK, Tianhe District, Guangzhou, with an R&D Center in Guangzhou. Narnia's mission to create a safe, natural, and nutritious life is based on commitments to integration and promotion of functional food ingredients.

Graminex's active ingredients are grown and processed for the dietary supplement, nutraceutical, pharmaceutical, food and skincare industries, focusing on prostate health, urinary care, menopausal support. Graminex® is the leading producer of solvent-free Graminex® Rye Pollen. Graminex® owns and manages over 6,500 farm acres in Ohio,
