Li Deming, Director of the Department of Agriculture and Rural Affairs of Jilin Province, and his delegation visited Syngenta Group China

Li Deming, Director of the Department of Agriculture and Rural Affairs of Jilin Province, and his delegation visited Syngenta Group China

Syngenta Group President Liu Hongsheng met with Li Deming, Director of the Department of Agriculture and Rural Affairs of Jilin Province, and his delegation at the Beijing office of the Chinese Party Committee. A detailed discussion was held between the two parties regarding contemporary agricultural services and seed industry innovation.

President Liu Hongsheng said that Jilin Province is an important commercial grain production base in my country. Jilin Province has been regarded by Syngenta Group China as an important strategic area for a long time. Taking the implementation of all-round cooperation as an opportunity, it has accelerated the layout of key businesses to support Jilin Province in achieving food security and promoting sustainable agriculture. Syngenta Group China will closely follow Jilin

Province's agricultural and rural development plan in the future, and make positive contributions to assisting Jilin Province in implementing the "100 billion kilograms of grain" project and developing high-quality agriculture.

Li Deming introduced the basic situation and development strategy of agricultural and rural work in Jilin Province. He said that Jilin Province and Syngenta Group China have a good foundation for cooperation. Jilin Province hopes to promote the "corn production increase of 10 billion jin" project in western Jilin Province by promoting integrated water and fertilizer technology, dense planting technology and high-standard farmland construction.

Syngenta Group China hopes to further leverage its product technology advantages to help Jilin Province achieve its production increase target. At the same time, it is hoped that the two sides will further explore and strengthen cooperation in large-scale agricultural operations.
