### PrairiE Systems, a leader in Feed Management and Procurement Software

Ever.Ag, a leader in providing comprehensive software and services for the agricultural supply chain, is excited to announce the acquisition of PrairiE Systems, an innovative company specializing in feed management software for pork producers. This acquisition underscores Ever.Ag's commitment to adding value to the global food supply chain with their solutions across various sectors of agribusiness, particularly in animal protein production.

PrairiE Systems is renowned for its easy, empowering, and effective software solutions, including the Feed Allocation System (FAS), a sophisticated feed management software and Smart Order, an e-procurement system for ordering feed with the click of a button. These products have been instrumental in optimizing feed efficiency, enhancing livestock management, and streamlining procurement processes for pork producers, including large national pork producers.

"PrairiE Systems has been a leader in livestock feed management and feed procurement for nearly two decades, serving some of the largest players in the pork industry, providing mission critical software to pork producers," said Scott Sexton, CEO of Ever.Ag. "Ever.Ag looks forward to supporting and expanding the vision of PrairiE Systems, making greater investments in the product to drive value to pork producers and everyone across the pork value chain."
