Signed a strategic cooperation agreement in the field of pesticide circulation

Signed a strategic cooperation agreement in the field of pesticide circulation

Zhongnong Lihua Biotechnology Co., Ltd. and Jiangsu Yangnong Chemical Co., Ltd. held a strategic cooperation exchange meeting and jointly signed a strategy Cooperation agreement, officially becoming a strategic partner for pesticide manufacturing.

Chairman Su Yi of Zhongnong Lihua, General Manager Huang Baiji, Executive Deputy General Manager Li Mingguang, General Manager of Crop Health Division Liu Shuncaï, General Manager of International Business Department Zhang Aijuan, Director of R&D Center Zhang Xiaojun, General Manager of Yangnong Chemical Wu Xiaoju, General Manager Senior Consultant Dong Zhaoyun, Deputy General Manager Shenyang, Director of the International API Department Lu Juan, and Deputy Director of the Domestic API Department Jin Yuhe attended the exchange meeting and signing ceremony.

China is encouraging to build a community with a shared future for mankind, adhering to the responsibilities of a major country, and using internal circulation to drive external circulation have been completely implemented during the realization of this strategic cooperation. The two parties have achieved leapfrog development in particular during the winter of 2023, and the scale of cooperation has reached an all-time high.

The two parties reached a consensus to give full play to the channel advantages of Sino-Nong Lihua's "national team" in the field of pesticide circulation and Yangnong Chemical's R&D and production advantages in technological innovation and pesticide creation, in the fields of technical materials, intermediates, preparations and international market development.

Achieve all-round strategic cooperation, realize resource sharing, collaboration, integration and complementarity, and strengthen in-depth linkage and collaboration in the upstream and downstream industrial chains to achieve future market strategic expansion of both parties and create greater business value for both parties..
