New, state-of-the-art laboratory building and the renovation and expansion of existing facilities to strengthen R&D capacities

Syngenta is investing around â?£40 million Swiss francs (\$45 million) in the expansion and modernization of its site in MÃ¼nchwilen in the canton of Aargau as part of an expansion project. By 2027, the investment will include the construction of a new, state-of-the-art laboratory building and the renovation and expansion of existing facilities in order to sustainably strengthen research and development capacities and promote innovation at the home site.

The Basel-based agricultural technology company Syngenta, which researches, produces and has its headquarters in Switzerland, is investing around 40 million in the MÃ¼nchwilen site, where the group operates processes and product development through specialists in the areas of analytics, process technology, formulation and packaging.

The production processes for all Syngenta crop protection products worldwide are designed and developed in MÃ¼nchwilen. These ensure the quality and stability of the products.

The investment project, which is scheduled to be completed by 2027, includes the construction of a new, modern laboratory building equipped with the latest technologies and thus meeting the requirements for development in the future. In addition, existing buildings will be renovated and modernized. New meeting areas are planned outside to promote exchange and collaboration among employees and to create an attractive working environment.

"With these investments, Syngenta is reaffirming its determination to have a long-term presence in Switzerland and to strengthen Switzerland as a business and export location. We are committed to a future-oriented and innovative environment in order to remain internationally competitive and to ensure our leading position in the research and development of innovative crop protection solutions," said Roman Mazzotta, Country President Switzerland at Syngenta.

Sebastien Stoessel, Plant Manager MÃ¼nchwilen, adds: "Since its founding, Syngenta MÃ¼nchwilen has established itself as a central location for the development of innovative crop protection solutions. With the comprehensive expansion project, MÃ¼nchwilen will set a leading international standard in chemical process and formulation development for the benefit of our customers."

The expansion measures at the MÃ¼nchwilen AG site reflect Syngenta's commitment to comprehensive sustainability and corporate responsibility. Through the optimized operating processes and improved infrastructure, the company expects not only increased productivity but also a noticeable reduction in its ecological footprint.
