Vietnam's FPT Corporation and Indonesia's Bappenas to accelerate digital transformation at smart agriculture

13 June 2025 | News

Using AI, green technology, and smart agriculture, the partnership will drive joint innovation to address urban management and sustainability challenges

Using AI, green technology, and smart agriculture, the partnership will drive joint innovation to address urban management and sustainability challenges

FPT Corporation, Vietnamâ??s leading technology conglomerate and the Ministry of National Development Planning of the Republic of Indonesia (Bappenas) have signed a landmark Memorandum of Understanding (MoU) to advance Indonesiaâ??s digital transformation, foster innovation, and develop future-ready digital talent in support of the nationâ??s long-term vision, Golden Indonesia 2045.

The partnership will drive joint innovation through pilot projects using AI, green tech, and smart agriculture to tackle challenges in urban management and sustainability.

The MoU marks a significant milestone in Indonesiaâ??s commitment to harnessing emerging technologies such as artificial intelligence (AI), green technology, and sustainable national development. The partnership also highlights FPTâ??s commitment to the Indonesian market since 2012, further strengthened after the recently upgraded comprehensive strategic partnership between Vietnam and Indonesia.

Under this five-year agreement, the two parties will collaborate on a wide range of strategic initiatives aimed at accelerating Indonesiaâ??s digital transformation. This includes the joint development of national and sectoral digital transformation strategies, with a focus on enhancing digital governance through the implementation of e-Government systems, Smart

Planning frameworks, and e-Monitoring platforms.

A key pillar of the collaboration is digital talent development. Several critical skill programs will be developed and implemented, including artificial intelligence, cybersecurity, software engineering, and data science. FPT will also offer strategic advice and policy input to help shape Indonesiaâ??s digital economy, focusing on sectors like logistics, fintech, and digital infrastructure.

In order to fulfill the Golden Indonesia 2045 Vision, we must harness technology, strengthen our industrial base, and invest in future digital talent,â?• explained the Minister of National Development Planning/Head of Bappenas Rachmat Pambudy.

FPT recently signed an AI partnership with Indonesiaâ??s state-owned oil and natural gas corporation, Pertamina, amid Vietnam General Secretary H.E. To Lam to Indonesia in March 2025.
