CloneSmart, a leading cannabis technology platform providing integrated marketing and sales solutions for nurseries, seed banks, distributors, and retail outlets, is launching a unique digital genetics marketplace located at [CloneSmart.com](https://CloneSmart.com).

CloneSmart is designed to streamline the process of genetics procurement for commercial cannabis farmers. Using this portal, businesses and consumers can find quality cannabis and hemp genetics near their location.

On CloneSmart, a real-time genetics menu is available to commercial farmers who can obtain information on where to find clones for consumers.

CloneSmart can be used to search or list cannabis clones, hemp clones, cannabis teens, hemp teens, cannabis mother plants, cannabis seeds, hemp seeds, and cannabis tissue cultures.
